Project Name	Industry-specific intelligent fire management system
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization :

Step-1: Team Gathering, Collaboration and Select the Problem Statement
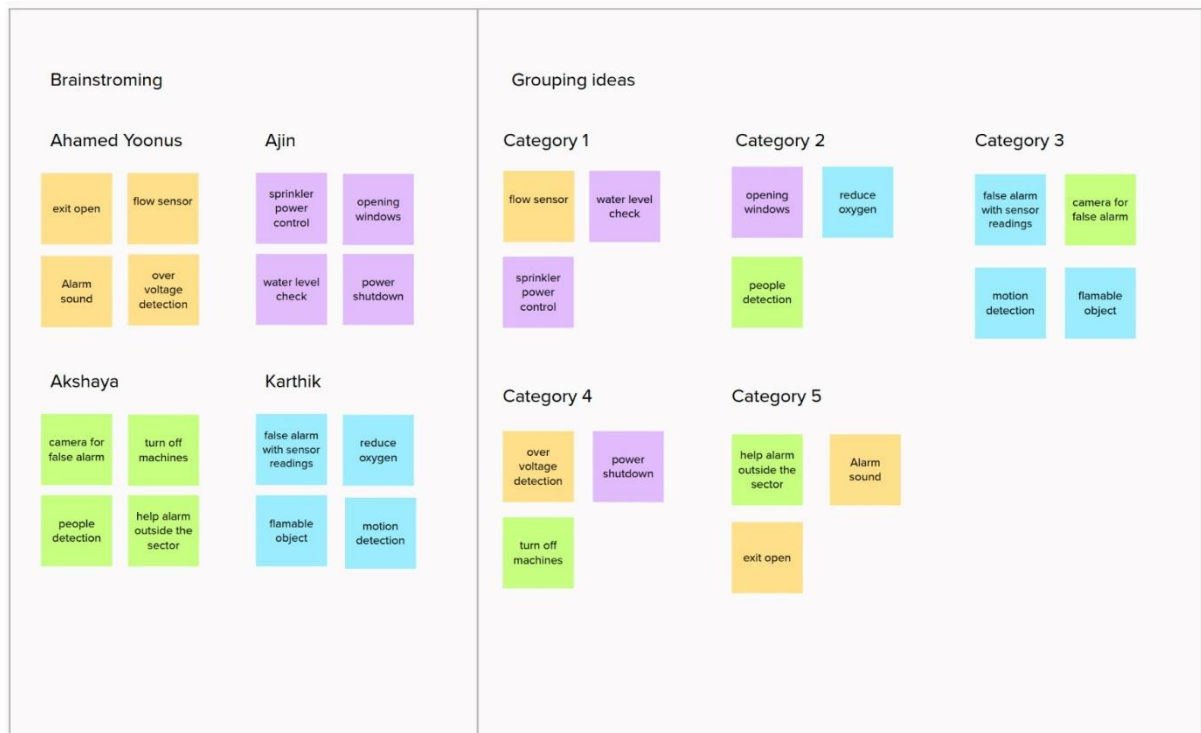

Brainstorming & Ideation

Industry-Specific fire management system

The fire management system is inevitable in a perfect industry, handling all the safety measures at the time of the accident is hard because we should consider labor safety and quick recovery of work. We can make fire safety methods smarter and automated with the help of the Internet of Things and take immediate actions with low effort. This also ensures better safety for the authorities of fire management, laborers, and the industry.

Problem Statement

To create a smart industy specific firemanagement system using IoT. It should have all the basic features for handling fire also it should report the incident to the fire department

Step-2: Brainstorm, Idea Listing and Grouping

Step-3: Idea Prioritization:
